

ENERGY & ENVIRONMENTAL POLICY STATEMENT

Keeling & Walker Limited is a leading manufacturer and worldwide supplier of tin based materials, mixed metal oxides and functional inorganic materials, and is dedicated to achieving the highest levels of environmental integrity and sustainability in all its activities.

Our policy is to be fully compliant with all relevant regulatory requirements and to monitor, review and minimise any environmental impact resulting from our operations.

To this end Keeling & Walker Limited operate an environmental management system and an energy management system that meet in full the requirements of ISO14001 and ISO50001 respectively.

Keeling & Walker are committed to delivering continual improvements in resource efficiency and environmental performance through energy efficiency, recycling, waste minimisation and efficient use of raw material by developing and investing into processes and equipment for lowest environmental impacts.

Our energy and environmental management systems provide for the setting and measuring of objectives and targets as well as a continual reappraisal of working methods and techniques. This is formally monitored through management review.

Keeling & Walker Limited ensures, via the provision of information, instruction and training, that all employees are fully conversant with our energy and environmental policy and our commitment to minimising environmental impact.

This Energy & Environmental Policy is an essential part of the overall business policy of Keeling & Walker Limited and its continuing suitability within our business policy will be regularly reviewed.

Dr Dieter Guhl
Managing Director
